## Narrative

*The following responses are from a variety of participants; administrators, community members, consumers, family members, peer support specialists and professionals.*

Overall, the presenters received positive feedback from participants. Participants indicated that the most helpful part of the training was: vignettes; thinking about PECFAS in terms of different levels of severity.

Information cited as being the least helpful included: all of the information wasn't necessary for those already certified in CAFAS; would have liked more interaction and less reading directly from slides.

Participants indicated they will use the information provided to: assist clinicians and supervisors with PECFAS scoring; for certification.
