 - Other: 0.0% (*n*=0)

Presentation Assessment

Table 1 - Presenter Evaluation

	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree
1. The presenter demonstrated mastery of the subject matter. (<i>n</i> =7)	85.7%	14.3%	0.0%	0.0%	0.0%
2. The learning goals and objectives were clearly stated. (<i>n</i> =7)	71.4%	28.6%	0.0%	0.0%	0.0%
3. The presentation was well organized. (<i>n</i> =7)	85.7%	14.3%	0.0%	0.0%	0.0%
4. The visual aids were effective. (<i>n</i> =7)	85.7%	14.3%	0.0%	0.0%	0.0%
5. The quality of the handouts and materials were helpful. (<i>n</i> =7)	85.7%	14.3%	0.0%	0.0%	0.0%
6. The learning goals and objectives were met. (<i>n</i> =7)	85.7%	14.3%	0.0%	0.0%	0.0%
7. The presenter(s) were responsive to the participants' questions and comments. (<i>n</i> =7)	85.7%	14.3%	0.0%	0.0%	0.0%
8. The information presented was relevant to my work. (<i>n</i> =7)	85.7%	14.3%	0.0%	0.0%	0.0%

Narrative

The following responses are from a variety of participants; administrators, community members, consumers, family members, peer support specialists and professionals.

Overall, the presenters received positive feedback from participants. Some of the respondents stated that the entire training was great and helpful when asked what information was most helpful. Others responded that the most helpful part of the training was: process of utilizing the sandtray; experimental activities; how to structure a sand play session; materials needed for sandtray therapy;

Information cited as being the least helpful included: information associated with outpatient therapy and not home-based.

Participants indicated they would use the information to: use as a treatment modality; will invest in some sandtray materials to use with some of the children I work with.

Other topics suggested by participants included: sensory processing; trainings and interventions directed toward neurobiological development; IMH with military families; assessments.
